

# Cautions in Using The Connector

## General precautions

---

1. The appearance and some of the stated specifications may be changed without prior notice due to product improvements.
2. This catalog provides a general overview of specifications. Please ensure to exchange the official delivery specification document before use.
3. When soldering, if a load is applied to the terminal, there is a risk of deformation or performance degradation depending on the conditions. Please take caution.
4. When soldering, avoid using water-soluble flux as it may cause corrosion of the switch.
5. Do not allow flux to adhere to resin parts
6. This product is not designed for cleaning, so do not attempt to wash it.
7. To enhance reliability, please verify product quality under actual usage conditions.
